

Medications are probably the single most important healthcare technology in preventing illness, disability, and death in the geriatric population (Avorn, 1995).

Medication Management Specialty Program

Visiting Rehab Services, LLC, has developed an evidence based, multi-faceted Medication Management program that utilizes skilled Occupational Therapy treatment to increase a clients independence with obtaining, managing, and administering their medications.

Medication Error Facts:

- ✓ 5th leading cause of death of older adults
- ✓ Occur with up to 40% of all adults
- ✓ Result in 50% of all hospitalizations
- ✓ 88% of hospitalizations of adverse drug reactions are preventable

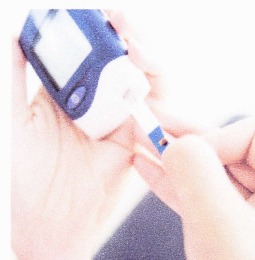

Highlights of Medication Management Specialty Program

- ✓ Licensed Occupational Therapist evaluate factors that limit the clients ability to manage their medications.
- ✓ Licensed Occupational Therapist provide treatment and recommendations of adaptive strategies to increase the clients ability to obtain and follow their medication routine.
- ✓ Licensed Occupational Therapists communicate all medications to the clients Physician and Pharmacist to review of side effects and therapeutic duplications.
