Concerned About Falling?

RISK FACTORS INCREASING THE PROBABILITY OF FALLING:

- Problems with walking and balance
- 4 or more medications
- Low vision
- Tripping hazards in the home
- Foot problems, unsafe footwear
- Dizziness/decreased blood pressure when transferring

FALL PREVENTION & WELLNESS SPECIALTY PROGRAM

Visiting Rehab Services, LLC, has developed an evidence based, multi-faceted Wellness and Fall Prevention Program that treats risk factors that cause falls, thus decreasing the risk of acute hospitalization.

DECREASING RISK FACTORS = DECREASING RISK OF FALLING:

Number of Risk Factors		Chance of Falling
0	↓↑↑↑↑↑↑↑	1 in 10 person will fall
1	↓↓↑↑↑↑↑↑	2 in 10 persons will fall
2	↓↓↑↑↑↑↑↑	3 in people will fall
3	↓↓↓↑↑↑↑↑	6 in 10 people will fall
4 or greater	↓↓↓↑↑↑↑↑	8 in 10 people will fall

Visiting Rehab Services will provide skilled Physical and Occupational Evaluations and Treatments through a client's Medicare Part B to Decrease the Risk of Falling

- ✓ **Gaiting Training and Balance Dysfunction**
 - ✓ **Environmental Assessment**
 - ✓ **Vision Screening**
 - ✓ **Medication Review**
 - ✓ **Vestibular Assessment**
